

# PARIBESH REGMI

Graduate Research Assistant — Rochester Institute of Technology

390 Clay Rd, Rochester, NY, 14623

✉: pr8537@rit.edu \* 📞: +1 585-490-7306 \* 🌐: www.regmiparibesh.com.np

## EDUCATION

### Computing and Information Science

Rochester Institute of Technology

PhD Degree

08/2021 - Present

Advisor: Prof. Rui Li

**Relevant courses:** Statistical Machine Learning, Deep Learning, Deep Learning Security, Foundations of Algorithms, Software Engineering

### Electronics and Communication Engineering

IOE, Tribhuvan University

Bachelor's degree

2014 - 2018

**Thesis:** Nepali Speech Recognition Using RNN-CTC Model

## WORK EXPERIENCE

### Lab of Use-Inspired Computational Intelligence (LUCI)

2021 - Present

Graduate Research Assistant

Rochester, New York

### Amazon.com Inc.

Jun - Sep 2025

Applied Science Intern

Santa Cruz, California

### LogPoint

2018 - 2021

Solutions Engineer

Lalitpur, Nepal

- Solved system/software issues at the customer's end.
- Troubleshooted/maintained system and software associated to cybersecurity, networking, Linux, user and entity behavior analysis (UEBA).

## RESEARCH INTERESTS

Machine Learning, Deep Learning, Bayesian Methods, Generative Models - (VAE, Diffusion/Flow Models), Machine Learning on Graphs, Vision-Language Models (VLMs)

## PAPERS/PUBLICATIONS

### Enhancing Shortcut Models with Cumulated Self-Consistency Loss for One Step Diffusion

Paribesh Regmi; Sandesh Ghimire; Rui Li

Under Review

### Bayesian Neighborhood Adaptation for Graph Neural Networks

Paribesh Regmi; Rui Li; Kishan KC

Transactions of Machine Learning Research (TMLR), 2025

### AdaVAE: Bayesian Structural Adaptation for Variational Autoencoders

Paribesh Regmi; Rui Li

Thirty-Seventh Conference on Neural Information Processing Systems (NeurIPS), 2023

### Predicting Biomedical Interactions with Probabilistic Model Selection for Graph Neural Networks

Kishan KC; Rui Li; Paribesh Regmi; Anne Haake

arxiv.org

### Nepali Speech Recognition Using RNN-CTC Model

Paribesh Regmi; Arjun Dahal; Basanta Joshi

International Journal of Computer Applications, 2019

## RESEARCH/PROJECTS

### **Adaptive Token Pruning for Efficient Inference in Video-Language Models** Summer Internship 2025

- Developed an algorithm to efficiently process video inputs in vision-language models by reducing the number of visual tokens for LLM to process.
- The algorithm prunes out the redundant visual tokens in two stages: frame and token-level pruning. We also determine the number of tokens to prune based on the dynamism in the video content.
- This allows the deployment of VLMs in low-resource edge devices.

### **Efficient Sampling in Diffusion Generative Models** 2024 - Present

- Developing algorithm to improve sampling efficiency in diffusion-based generative models.
- The algorithm allows training for a few-step denoising along with the base diffusion model in a single training pass.

### **Representation learning on graphs** 2022 - 2024

- Applying Bayesian model selection to enhance graph representations by inferring appropriate neighborhood scope for message aggregation in a graph convolutional network (GCN).
- Using graph characteristics to infer the most plausible set of neighbors for message aggregation in a GCN.
- Expressivity analysis shows that our approach improves the expressivity of a GCN with larger layer depth.

### **Bayesian model selection in VAE** 2022 - 2023

- Developing a Bayesian model selection framework to infer an optimal model structure in variational autoencoders, guided by the data
- The framework eliminates the need to fine-tune network complexity for the encoding and decoding networks
- The framework is compatible with the state-of-the-art VAE regularization methods as well as various VAE variants, further improving their performance

### **Leveraging deep learning in graphs for biomedical interaction prediction** 2021 - Present

- Application of developed graph algorithms to real-world biomedical scenarios, like inferring the interactions in the datasets like PPI(Protein-Protein Interaction), DTI(Drug-Target Interaction), etc.

### **Nepali Speech Recognition** 2018 - 2019

- Application of deep learning to enhance the Nepali speech recognition system, transitioning from a limited vocabulary size to a large corpus. Connectionist Temporal Classification (CTC) loss aided in enabling end-to-end training of the recurrent neural network model.
- Defined a Nepali language character set of 67 characters.

## AWARDS

### **Fully funded Ph.D./ Research Assistantship at RIT** 2021 - Present

Full financial support for my Ph.D. from NSF grants

### **Fusemachine AI Fellowship Award** 2017 - 2018

Fellowship offered by Fusemachines (fusemachines.com) for AI and Machine Learning study

### **Full Scholarship for Bachelor's in Engineering** 2014 - 2018

Ranked 28<sup>th</sup> among 13,000 applicants in the engineering entrance examination to gain a full scholarship

## SKILLS

<b>Programming</b>	<b>General:</b> Python, moderate expertise in Java and C++; <b>ML and DL:</b> pytorch, scikit-learn, numpy; <b>Visualization:</b> matplotlib
<b>Troubleshooting</b>	Solving system(Linux) and software related issues. Three years of work experience in troubleshooting.
<b>Leadership</b>	Former event manager at Nepalese Student Association, Rochester Institute of Technology (NSA-RIT)
